TMC SPECIFICATION NO. S-356

TITLE UNBALANCED TO BALANCED TRANSFORMER FOR MODEL AMC JOB

APPROVED

AJJ

SUBJECT: TR-061

PURPOSE:

This transformer has been created for the purpose of converting the terminals of the AMC - 6 - 2 - 70 U from an unbalanced 70 ohm condition to a balanced 70 ohm condition.

The transformer is simply plugged into the front or rear jacks, as the case may be, and the balanced antenna then brought to the transformer input.
